

The Spirit Premium Area Light

Next-Level Area Lighting Solutions

Where Shining a Light on Performance You Can Count on

The Unite Spirit utilizes its fully rotatable optic system with on-demand energy reliability to provide top-of-the-line performance.

Through multiple mounting options and distribution types, these cutting-edge area lights make for a versatile solution for parking lots, worksites and roadways. Leverage Unite's quick-ship program to conveniently get your Spirit Fixtures in 2 days or less!

The Spirit Premium Area Light provides:

- A highly-durable powder coat finish over chromatic conversion coating
- Die-cast aluminum IP65 housing UL listed with integral heatsink
- 4 convenient mounting types for all installations
- Thermal and shock-resistant 3G-tested for roadways and crane mounting
- High-performance optics including type-5 wide and rotatable type-3

UNITE

Combined Excellence For a Premier Product

Equipped with nothing short of the latest, cutting-edge features, the Spirit Series has every feature an area light can ever need.

From its pole mount that safely secures it to any pole, to its slip fitter bracket that enables even the most precise of angles where they shine brightest.

These are just a few reasons why our happy customers say this area light is considerably greater than the sum of its parts.

We're trusted to illuminate North America and we won't stop there. Discover what's next with our soon-to-release exterior lighting products at [www.https://uniteltg.com/](https://uniteltg.com/)

Precise Control Where it Counts

As efficient as it is powerful, the spirit area light is backed up with powerful features that are easy to control. Together, they make for optimal convenience, wherever you may be.

Photocell Our twist-lock photocell provides efficient, hassle-free and cost-conscious control at your fingertips.

Fully-Programmable Microwave Sensors Seamlessly integrate your Spirit with microwave sensors for uncompromised control. This includes daylight harvesting, full occupancy sensing, high-to-low light dimming (10%, 30% or 50% standby levels) with cyclone hold times up to one hour.

Seamlessly Customizable Controls

Choose from three state-of-the-art control systems that give you on-demand command when you need it most.

Silvair Wireless Control Leverages high-level bluetooth protocol that provides you with an open source wireless control system. Easily integrate it with EnOcean switches for on-demand wireless network capabilities.

Autani Wireless Control Designed for mid-range controls, the Autani System features advanced space utilization, asset counting — even temperature data collection and advanced energy monitoring so you can capture the full story.

Synapse Wireless Control The pinnacle of outdoor wireless controls and designed for optimal use for a single site, up to entire cities. Leverage a 1,000-foot range, with a capacity of up to 10,000 lights within one cohesive network. Its network isn't reliant on the internet and can be fully integrated with BacNet.
